It's very simple as you have to remain away from such kind of sites which are offering membership fee to see the project details which they have.

They may be charging you fee for such kind of information that is readily available on the internet.

They try to hit you emotionally by figuring out your thinking, your mental approach and your financial condition by talking to you. Your conversation speaks a lot about your mental state. These

sites started to be very aggressive upon you and dominate you in order to prove them superior and true. If once they do that then you will be a pie cake for them.

Most of the times, they trap you by providing fake information about their previous projects so that you will keep your interest in them and will try to get further information about them. Their main aim is to convince regardless of the fact that whatever way they have to adopt in this process.

The information that is provided by these sites is mostly paid and obviously fake as well. These stories are scripted in such a brilliant way that at first look no one can identify them that they are spam.

In Quest for a Home Job Site

You are searching for work home site, and have opened one site and you see those beautiful and appealing views, expensive cars, exclusive village, big pools, nice hotels, superb foods and expensive clothing. These are just few of the many good things scammer sites can offer because they knew people are easily get carried with these luxuries to their advantage.

They will show you scripted testimonials from people that from nothing are now millionaires in just a matter of one month or even a week! I have had my share when I purchased a system

for work at home for \$49.99 and I tell you I almost freak out because it did not work out and what is bad about these opportunists is that, they target those who are really in need and broke like those who are unemployed, students, jobless moms. They target ones emotions of becoming free from debts and those big amount is really captivating.

The average person wants only little things to make life easier, these too good to be true offers are like a dream that they are persuaded to believe it can happen. Those big amounts of wealth are the things scammers are promising them. The presentations were so good that you will be encouraged to join today.

Take Hold of Your Credit Card

These enormous claims of financial freedom make every one believe that it is the ultimate solution to their financial problem that they do not want to waste time and they act now! The offer is very irresistible that you cannot afford to lose it so you act immediately; you give your credit card number or your bank account number or even send money through western union. Guys do not do this!

The truth about Work at Home Jobs

Those big promises of instant cash, a week of tremendous wealth with no or little work at all are completely not true! Just imagine it, how can you get wealthy in an instant with small investment? Not even the wealthiest person will give away 1 million dollar for nothing; otherwise no one will work very hard if all these are true. Absolutely these are just one way of enticing you. Those advertisements are false!

One thing that you should take a look if the site is false or not is to meticulously examine the print at the end or base of the web site page; there you will see a very tiny message that is definitely made tiny print for a cause because they do not want you to know about it.

One thing is to read about the disclaimer. It says that, this site is not a guarantee, or this site is not an affiliate of or not registered of. This is the whole truth about the program. It will not guarantee you to earn that big money they are promising in the advertisement. A very clever scam site also comes in a stop watch on their site. And the phrase says there; make a decision now before time runs out! And another thing it say '30 people needed to complete and the system will be closed'. As an individual who doesn't want to miss the opportunity will be lured by joining and eventually paying.

Those are just strategies of these scammers who want to get money from you. If you are not carefully observing their tactics, you will be easily getting carried away because they trigger on your emotions. It only means one thing, they are encouraging you to buy by using your emotions before the product real identity is laid on you and before you realize it, and your money is gone. Those strategies are so clever that they focus on your emotions and probably your weakness.

Since they can get considerable amount of money from you they are not really concerned if that was your last dollar or what the system or program will do to your advantage. It's all to their advantage. If entertain and get carried by their advertisement, you soon regret it later after joining.

The truth it, those advertisement that says 30 members left to join or you have 24 hours to join before finally closing the system will literally be there and available even after a month of your joining. If you do not believe me, leave the site that says you only have 24 hours to join, after two days you come back and it is still there.

In other words, you have to properly scrutinize what you are joining into by effectively checking the promises, the claims and the benefits that these sites are offering you before you act and join now. Furthermore, be aware and guard yourself of the many scammers in the internet. this can be done by not rushing into

your decision and not getting emotionally to their promises, but by evaluating the website, the business it offer and the reason why the product or services is being offered.

You have to evaluate on the following:

- Search for genuity of the business
- Are they offering a reasonable price compared to the product they are offering?
- Will they require you to have down line, is it net working?

More often than not, the business idea has no significant to what they are offering and definitely there is no significant why you should take an immediate action or rush joining or it cannot give you large amount of money that will make a reason why someone like you and me will get in a hurry before they are gone.

Take time to know more about that company. The internet is your best resource in taking information for many companies with fifty, fifty credibility. Just type the company name on the internet search box or in Google, wherever you want to search them then you will see lots of comments, be thankful if it is good comments but most probably you will see bad comments.

Another thing that you should do to get reliable fact is to join forum so that you will know what members are saying to that

company. There you will see various complaints from members who have joined the company offering.

You have to take note of the following:

- Did you see any complains about the company's services?
- Is the business a registered one?
- Did you find any customers who are satisfied with the product?

Accordingly, when you joined those home job opportunities, what did you really get that eventually change your perception about life and did that really made you rich? Basically all that you will get is a reading material that has general information on how to get wealthy, and generally they are very common advice from day today lives. Or it could be embarrassing sometimes when you see no information at all but just another site that will lets you join and again you have to pay for membership.

I will tell you this, you cannot find anything new in there, and they are all the same scam ideas wanting to get your money! Remember these scammers are geniuses trying to make new tricks to make you believe that it is something different when in fact it is just the same program and was repacked to lure you.

One thing that' you will get for sure is frustration and regret why you have joined such a scratch company. And another thing that

is really sure to happen is that, these companies because they already have your information, like email address, will from time to time send you an email regarding the same or worst your credit card will be automatically debited every month.

Although it is quite improper to say but the only thing that these scammers can profit financially is to let someone (you and me) join and registered their company and pay. Once you are being recruited, you need to pay certain amount for membership and that payment will be chopped as commissions from your referrer and to the owner.

The bad part is that, it is hard to convince people to sign up or join, which is supposed to be you will get commission from them. The program is not and will never be the solution to your financial crisis in fact it will only put you into more debt.

These scammers will do everything to boost the program in any way he can. He would simply try to compensate from his effort and try to bring back the lost money. Sometimes they would say that there are faults on the recipient following to guidelines, which often result of not claiming the money.

Those excuses made by home business scams are attempted to redirect the fault and responsibility to the poor income seeker by placing all the blame on them and their lack of understanding. If you have only read those tiny prints located at the bottom of the page, you will see that they are dissolving any responsibility and

legal action that a genuine company should take responsibility at. This action will exclude them of fiscal fund and the responsibility that lies on it.

It is very essential to follow advice, read that tiny message located at the last page of a web site, read a lot of information regarding the site and do not push through if the offer doesn't seem right. Paying for membership for a certain product that is too good to be true is absolutely a scam.

Scammers will do everything to make their ads appear like a legitimate one. Often times they place their program on job sites so that you won't hesitate to join them. They will make many strategies just to let you sold out with their program and eventually exposing them your account number.

You have to be careful with those promising jobs either, read at their ads, because it says there that they don't offer job but rather they provide you the job opening on another database. To keep away from sites like this, take note and record all the job sites you come across with. Record the site, the company, date you have applied and the website of if there is any information that will be beneficial as reference later.

This advice will save you from future regret and possible trouble as time goes on. It is alright to spend more time searching on the web for some useful information 'bout the company than regret later. This will also help you for easier access of the company

whenever you need to contact them and most especially it will help you find an answer in the future when the company calls your attention.

I do not tell you not to apply for home job, but rather I encouraged you to apply all possible home jobs you may encounter but just beware of scams. Keep your credential updated, the more up to date your resume is, the more chances of getting hired. Most often than not, companies online will reply your application in a couple of months so do not get discouraged when it is almost a month and they did not contact you.

To narrow your search, type a specific job that applies to your ability and experience. Always take time to apply for several companies that offer same or relevant position to what you are applying for, this way you will not think of one company only but you have many options.

Chapter 5:

How to Dissect Home job Offer?

The work home community is an absolute place for scammers to breed and other opportunists. There are too many false offers and home base business in this kind of sites. There are those who do not collect money and there are those also who take a little amount of money from you. It is really hard to distinguish genuine and scam work home opportunity. But did you ever think why these jobs are enormous? Because mostly they are not legitimate businesses, though there are some that are legitimate.

But be aware also of those legitimate businesses since they are the target of these scammers. Scammers, because of their excellent knowledge of the internet, they can create a website that looks very similar to the legitimate site and there they will start their evil work. It needs a lot of time finding the legitimate one.

The most visible and obvious scam is when someone calls you or email you about a job offer that you never applied for or when you receive a mail informing you that you won lotto without even joining the site or worst without even placing a bet to them.

These sites come from unknown sites and the offer can never be trusted.

How Scammers do it?

These scammers use home job sites and take some information to possible victim, taking your complete name, email address, telephone number, and some vital information about you and from there they will have the chance to contact you and start digging more about you until you come to trust them. Your information is taken from forums database, or in jobs online on people who are searching for jobs. They are positive that people like you is easy to lure with because they are the people that needs money and immediate income and they pretence that they are the legitimate source of the job you are applying for.

The moment this scammers got your mail address, then they will work on that false job to make you believe that they are legitimate, and they will make everything so that they will get your trust and finally convince you to provide them your account number and credit card. If you happen to receive a mail like this, all you have to do is to delete them immediately without reading them.

Responding to their mail is of no use and will only put you into trouble because this email is only a test to check if the

information they get is valid or not. If they verify that the information is valid, they will provide more and more job openings. Jobs that you can never resist its offer; if you delete them and do not response to their mail they will not also dare to mail you because they will think that the email is invalid or inactive.

One thing that is also not good is some legit companies are selling information of their members for money. Another designation of a scam site is that, they post jobs per hour on a certain site even when no company is offering a certain job. They will promise you a better job and a promising income, but they require something, it could be a payment from you.

If ever you encounter a job offer like this; a company that take information from you like bank account, credit card or ask you to send money in place of the job offered, you can report them to crime complaint' center in the internet. Most of these scammers claim that they are registered with the FBI and the NWCC Center. If you care to report these kinds of sites to the crime center you will definitely help the internet jobs legal and safe from scammers.

Chapter 6:

What Are Some Opportunities that you should avoid?

There are those home businesses that are scams you have to be wary of this also. These scammers appear to be harmless, but the truth is they are dangerous because they can use your information to some more dangerous situations.

Lottery

May I ask you did you bet on lottery online or have you won lottery online? Maybe you have won lottery online without even placing a bet, especially that UK lottery where they claim to have drawn your email in electronic lottery. This is basically true when you try to respond to one of their email and from time to time you will receive email stating that you won lottery sweepstakes.

Believe me those bulk emails that comes into your in box are scams and you should not respond to them. If you respond the first thing that they will do is to get vital information from you

and then your account and if they cannot they will ask you to deposit money which they say for charges.

The moment you entertain their mails, the more that they will pressure you to send the money so that they can process the transaction, which according to them is the winning prize. Do not believe on them. I was one their victim, after sending the money, which they say are charges, then they never gets back to me and there is no way where I can get the money back because they never responded to my mail and this could also happen to you once you entertain them.

And there is also one thing, if you try to send them the amount, they require you again to send another as payment for other charges and you could lose big amount of money if you listen to them and before you realize it they are gone.

Once you realize it, your money is gone and there is no way where you can recover your money. Because the truth is the company never existed and the person who contacted you is a swindler and you have been scammed.

The Money Transfer

Another scam that you will receive in your in box, is you will be required to dispose billing information such as address because they will send you millions of dollars, but to be able to process

the transaction, you have to shoulder demurrals or interest from Banks or they will ask someone who claims to be a representative.

Or it could be that a large sum of money was found dormant from a Bank and that they need a foreign partner in order to transfer the amount and your only participation is that, you will pay the attorney and other legal charges they claim and the money will be transferred to your account. There are two things involved here, if they are true (which is very impossible), you will have entered into an illegal transaction and you could be put to jail when auditing comes, or this act is very immoral for a professional to enter into this kind of transaction.

They will ask you to wire transfer the money, which they are claiming to be charges incurred during the process or they will ask you to send them via western union. They will provide you with complete transaction on where will you send the money and whose name will be written if ever you send the money. And do you know what's annoying with them? They will pressure you to send the money as soon as possible like there is no tomorrow.

If you entertain them and agree to pay the amount, then things will soon change into something complicated. You then will be persuaded to transfer the money into their hand waiting for that promise of millions that will never happen. This will appear like an answer to all your financial needs that you have been praying all

your life. The bad thing is you will not know it is fraud until you have completed the transaction.

When you see an initial amount on your account, it feels like really genuine. Then you begin to initiate sending the money to that unknown contact, but after a week the checked that was deposited to your account was faked and you mess everything because you are get charged of the bounce check liability. As a result, the bank will be chasing you because of the big amount of liability when you deposited a bounce check and you are in a total chaos.

Per banks and lending policy all losses (bounce check is considered as losses), is a responsibility of the account holder. Any issue regarding financial discrepancy will be taken against you. The bank will not sympathized on what have happened to you, they care about their business and they do not care about your ignorance. And the nightmare falls back if you cannot pay the charges, chances are the bank will file a criminal case against you.

Without realizing it, you were into a money laundering act and the penalty is quite grave. You were fooled into giving cash, but the most awful situation is that, you can never do anything about it.

The Multilevel' Marketing System

This kind of marketing system is considered as scam and if ever you say they aren't scam, the chance of becoming a scam is so high. The multi marketing or commonly known as MLM is a kind of home base business with a concept of pyramiding scheme.

Basically, you become a member or affiliated service or a product by using it to convince people that the product is good and genuine. While you are using the product, you will also recommend it to your family and friends and then they will be required to join or become affiliate to be able to use the product. The person who makes MLM will make large amount of money and so those first 5 affiliates but below that, boy! You are only making those people rich and you leaving behind and broke.

Before you finalize your decision to join this kind of affiliation, first are you have to investigate and see who is behind that marketing system. To have a specific research, just type the company name and the word scam for example 'speed mobile scam' then it will bring you into more sites that tackles about members or affiliate of the company. From there you will know if the site is genuine or scam.

There you will also find out if the company has another online business. If it does then you know now and do not entertain any email from any companies related to the owner of that scam site.

You can also find criminal charges that the company or the owner might be involved with.

Most of these multi level marketing do not carry a specific product or services that are valuable. You have to think wisely before finalizing your thought of joining a MLM. You have to research the business name and gather much information so that you can decide wisely.

Chapter 7:

The Home Business

The home base business is common to those individual who likes to be free from bosses and those who want to earn extra income while sitting in the comfort of their home. They are the prey that scammers would like to make victims. The appeal is so intense if someone will tell you promise of big sum of money and not having a boss to who will control you.

These are the scammers promises – ‘how would you like to spend most of your time with your family and children? Saving extra money for gasoline and work right at the comfort of your home’? Does t sound familiar? Always remember that success rely on many things.

Two things you need to know to have a successful business at home:

1. Useful and valuable service or product
2. An in demand service or product

This is the reason why most home base business fails to succeed because they cannot fill the needs of customers. Example of these is poor quality of product and service or very close

competition. If you are really destined to make home base business, first, you had to make good research and of course you have to give your full attention to that business.

If you give your full attention to your home business, you are actually putting an efficient positioning of your business globally. Time is needed to promote your business and finding good customers are also time consuming. Just like building traffic to your site also needs time.

It is just natural for business to need large sum of money for a start up like computers, internet connection, and inventory and promo materials. It always makes sense to decide where you should place your money.

- What is the most important and needs large money, is it the computer, the inventory or the hardware?
- In introducing the product, should you need marketing materials to get better results?
- Should you need a small office or a bigger one?

Indulging into home business can be costly and you will definitely spend even a single centavo in your pocket so you have to be careful in putting up a home base business. Remember there are many out there who claim to be good home business but in reality they are only there to get your money and the product are not even useful.

The person involved on t his kind of activity will definitely avoid legal act because they are afraid to get caught.
